RESTful API — Assignment 4

Min Wu <mwu63@ucsc.edu>

Re-configure your Kanban project **using basic authentication** with username and password.

Write the following test cases:
1. Creating a Kanban card anonymously receives 401 status;
2. Creating a Kanban card with valid username and password will receive 201 status;
3. Creating a task for an existing Kanban card with valid username and password.
